

Dear colleagues,

After a one-year break, we will meet again in November 2025 at the 7th conference on physiotherapy in Piestany. Over the past years, this conference has found a firm place in the calendar of scientific events, and it should be emphasized that it is also the largest event of its kind in Slovakia.

The intention of this Congress is to connect physiotherapists with experts from other specializations, because physiotherapy intervenes in all clinical medical fields, but also in the lives of healthy people in the framework of prevention and strengthening good health. The main topic this year remains physiotherapy in an interdisciplinary context. University institutions from four European countries, namely Slovakia, the Czech Republic, Poland and Slovenia, are again participating in the organization of the Conference.

The picturesque spa town of Piešťany is exactly the place where physiotherapy naturally belongs. A significant change compared to the past is the venue, which is the premises of the Adeli Medical Center rehabilitation center, which specializes mainly in the treatment of patients with neurological diagnoses.

I believe that the participants of the Congress will gain a lot of creative inspiration for their future work during their stay. Last but not least, such events serve to strengthen professional friendships and establish new ones.

On behalf of the organizing committee, I wish our international scientific Conference every success.

Piestany, April 2025

Juraj Štofko
President of the Conference
